THE FOUNDER

AMU is the vision of Sir Syed Ahmad Khan, who was one of the greatest social reformers and a great national builder of modern India. He appreciated the need of Modern Learning parrallel to the traditional cultural values.

ABOUT AMU

Aligarh Muslim University is a public central university accredited by NAAC in 'A' grade. It was originally established by Sir Syed Ahmad Khan as Mohammedan Anglo-Oriental College in 1875.

NATIONAL PRIDE

AMU comprises all castes, creeds, religions and genders, and is an Institute of National Importance provided under the Seventh Schedule of the Constitution at its commencement.

ICT ENABLED PROGRAMS

Aligarh Muslim University, known for its profound history in academic excellence since 1875, and has now taken the **initiative to launch ICT-based learning services for its distance education programs.** Keeping in view the benefits of ICT-based learning; this initiative is launched to improve academic excellence in distance education. The programs benefitting under this initiative are the same programs which have been offered by AMU's directorate of distance education. However, the upturn of technology will make learning a dynamic experience for the students.

About The University

Aligarh Muslim University (AMU) occupies a unique position amongst universities and institutions of higher learning in the country. It was established in 1920, and evolved out of the Mohammedan Anglo-Oriental College (MAO College) which was set up in 1877 by the great visionary and social reformer, Sir Syed Ahmad khan. From its very inception, it has kept its door open to the members of all communities and from all corners of the country and the world. The Aligarh Muslim University is the realization of a vision which was broad, far- reaching and realistic

Spread over 467.6 hectares in the city of Aligarh, Uttar Pradesh, Aligarh Muslim University offers more than 300 courses in the traditional and modern branches of education. It draws students from all states in India and from different countries, especially Africa, West Asia and Southeast Asia. In some courses, seats are reserved for students from SAARC and Commonwealth Countries. The university is open to all irrespective of caste, creed, religion or gender. It ranks 8th among the top 20 research universities in India.

The Centre for Distance Education (CDE)

The Centre for Distance Education (CDE) is an integral part of the University (established under Section 5(9A) of the University Act). Adopting flexible and innovative methods of education to ensure 'independent learning' to anyone, anytime and anywhere, the Centre offers programmes of the study that are customized to meet the learning requirements of knowledge seekers as well as to ensure that they learn at their own pace and convenience.

There is a large section of society which is unable to participate in the normal stream of education due to occupational, financial or social constraints. All these people can get an opportunity to derive the benefits of education through distance mode. The cost of Distance education is preferably low so that educationally backward sections can take advantage of University's programmes.

The use of multi-media methods of teaching and learning widens the reach of education and enhances the quality of education. By taking advantage of the advances in information and communication technologies, the Centre aims at giving the students an opportunity to learn and appear for the examination of the course which will be conducted by the University

Centre for Distance Education has a special commitment to the cause of Women's education, particularly of the minority community, among those who are educationally and economically deprived section. They are provided with an opportunity to study at home supported with self-learning study materials, women can benefit immensely from this programme.

CDE has the potential to realize Sir Syed's dream of emancipating our down trodden community from the shackles of illiteracy and ignorance, and bring them into the mainstream.

ICT Enabled Programs

Home > About > ICT Enabled Programs

About ICT Enabled Programs

ICT (Information and Communication Technology) in education has been gaining recognition and importance in the last decade. ICT creates an impact in the role of unified communication which is not restricted to computer systems but extended to the other communication platforms. On an academic level, it provides students with relevant and contemporary experiences that allow them to successfully engage with technology and prepare them for life after completing the university programs.

AMU has been delivering its distance learning programs through the help of textual material and study centres. However, over the past few years, the best Universities across the world have adopted ICT services to improve the learning experience and magnify the quality of education for students pursuing classroom learning as well as distance learning. The youth of today lives in the world of internet where high quality services are instantly available. Students, at present seek academic opportunities that would

enable them to compete at a global level. AMU wants to also explore the ICT Platform to design and deliver its courses for the benefit of students tech savvy par excellence. The AMU distance learning programs with ICT aims to provide education for students and professionals without the barrier of distance and convenience

How It Works

Select The Course

Upload Documents

Pay The Fee

UNIVERSITY APPROVAL

Once the admission is approved, the University will provide the access to the students with a unique ID and Password. The Student can then login to their personalised course pages on AMU Learning Management System.

Download Our Mobile App

Audio/Video Lectures

Examinations

Get Degree Certificate

How it Works

1. The Student first needs to select the program of his choice from AMU website Course page.
2. The Course page will display the list of documents required. The Student needs to upload all the documents mentioned in the Course.
3. The Student can then pay the fee via University payment gateway. All the transactions are secured
4. Once the admission is approved, the University will provide the Student with a unique ID and Password. The Student can then log in to their personalized course pages on AMU Learning Management System.
5. The Student need to download the Exclusive Mobile App, where he/she can download the full course content online as well as offline and have the option to interact with the professors via messenger on smartphones. The offline mode of the course content can be accessed on SD Cards provided by the University without the need for any Internet connection.
6. The Students can view and learn from the lectures at their convenience and frequency. The Students will be awarded the Degree Certificate once they clear the University exams as per the grading rules assigned by AMU

About MOOCs

About Massive Open Online Courses - AMU

The first MOOCs emerged from the open educational resources (OER) movement. The term MOOC was coined in 2008 by Dave Cormier of the University of Prince Edward Island. In India, the Government has announced 244 online courses (MOOCs) that will be hosted on SWAYAM, a platform developed by Microsoft. These MOOC platforms will offer Indian higher education institutions ample of opportunities to foster helpful academic exchanges and learn best practices from other universities, pushing the Indian Universities toward achieving the global standards of higher education.

Under the phenomenon of Digital India Campaign, Aligarh Muslim University takes the lead to explore the ICT enabled platform. The learning modes have been scientifically developed with exhaustive Audio-Video Lessons, where students can access the lessons from Virtual Class Rooms. Students who are committed to their professional lives and yet want to pursue higher education goals will be able to take the best advantage of MOOCs courses. AMU, on other hand, provides them with exclusive student support that guides the students for a seamless experience.

This is a bold, ambitious, risky and ground breaking "innovation" and transformation that very few institutions in India are ready to establish the hi-tech learning platform for students.

AMU has always been the pioneer to set benchmarks in the education sector. The University want to successfully run the MOOCs programs to the benefit of students at large. The purpose behind the introduction of MOOCs at AMU would then be to add value to the education, in particular the learning for the students, community, in order to maximize the social capital, while driving down the total costs of education.

AMU MOOCs would ensure

Open Access

Anyone can learn a course for free with an access to Internet

Scalability

Courses are designed to support larger number of participants

Contemporary

Courses are planned to meet the global requirements of employability

Information and Communications Technology

Upgrading and Delivering expertise through Smart phone platforms

Wealth Creation and Self Sustenance

Aims at Entrepreneurial and Skill Development to enable the future generations earn higher income and become self-reliant
